

# “CRC Lab”

2nd Edition. September 2023

## Tools

In this lab, we are going to use Google Colaboratory, an open engine provided by Google where to run Python Code in the form of Jupyter Notebooks. The FAQ are available [here](#), a tutorial is available [here](#).

On AulaGlobal you can find the initial stub jupyter notebook. Download it and connect to the [Google Colaboratory Home Page](#). From the Home Page, select Upload and upload the provided file.

The instructions and the questions for running the code are directly embedded in the notebook. Follow the steps, by running the notebook cells.

## Evaluation

Provide your answers to the quiz in Aula Global. Steps 1-2 are mandatory, steps 3-4 are optional.
